

Science made smarter

# Titan™

Advanced made flexible

10 reasons to choose

Impedance,  
OAE, ABRIS and  
the revolutionary  
Wideband  
Tympanometry  
in one powerful  
device

**Interacoustics**

# Small & light weight

- Suitable for the travelling clinician
- Small footprint and light weight (360g/0.8lbs)
- Memory - 1GB built-in (maximum of 250 patients + tests)
- Ergonomic 'slim-neck' design & single hand use
  - easy test

# Versatile & Customizable

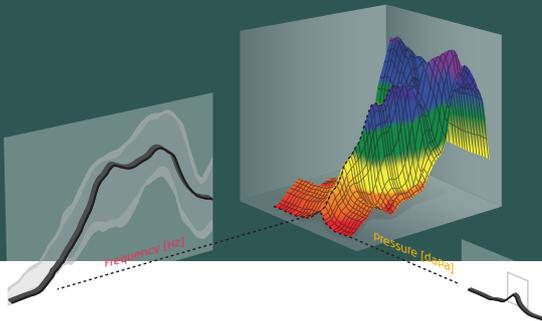

- Simple when needed, advanced when needed
- Create individualized test 'protocols', ideal for clinics with multiple users
- Integrates in any clinical workflow (PC, handheld, w/w.o. extension cable)
- Combined printing with other modules (Audiometry, DPOAE etc.)

2

# The revolutionary Wideband Tympanometry

- Multiple tymps in one sweep
- Wideband (averaged) tympanogram
- Absorbance measurements with age specific norm data
- A new dimension in testing middle ear pathologies
- 3D mountains of insightful diagnostic data

3

# Handheld & PC operated

- Desktop, wall-mount or handheld
- PC-controlled & handheld mode
- Long-extension with diodes and shoulder-box for remote control
- Connect to the PC and synchronize with the EMR system or database and share data

# Pump speed

- "Endless airflow"
- Always ready to start a new measurement
- Adaptive speed control around the tympanic peak

# Titan software

- Compatible with NOAH, OtoAccess® and EMR systems
- Compatible with other Interacoustics suites reducing the learning curve
- Can be supplied with DPOAE, TEOAE & ABRIS

6

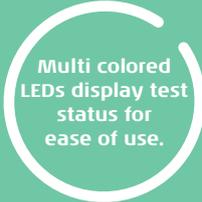

# Modern & smooth design

- Professional look in the clinic
- Visualize authority
- Combines medical AND esthetic lines
- Designed for single handed usage  
(weight balanced)

# Advanced probe system

- Lightweight probe for easy seal and fixation
- Light indication (L/R, status, seal)
- Short-extension with diodes
- Clinical extension cable with shoulder-box for remote control
- Superior data collection

Multi colored  
LEDs display test  
status for  
ease of use.

8

# Graphical layout

- High resolution color display (small and readable)
- Results displayed immediately 'in hand'; focus on patient, not equipment
- Intuitive menu structure

# Accessible test batteries

- Protocol management
- Tympanometry, Wideband Tympanometry, Reflexes, ETF, High probe tones
- Easy access = easy learning = efficient work routines
- Intuitive

# Science made smarter

## **Interacoustics is more than state-of-the-art solutions**

Our mission is clear. We want to lead the way in audiology and balance by translating complexity into clarity:

- Challenges made into clear solutions
- Knowledge made practical
- Invisible medical conditions made tangible and treatable

Our advanced technology and sophisticated solutions ease the lives of healthcare professionals.

We will continue to set the standard for an entire industry. Not for the sake of science. But for the sake of enabling professionals to provide excellent treatment for their millions of patients across the globe.
